TESTING HISTORY

If you previously took a test in the Illinois Licensure Testing System and did not meet the passing score of 240, attach copies of your individual score reports.

Use the Detailed Performance Analysis section(s) of your score report(s), as applicable, to determine the sections of the test in which your performance was weakest, and then plan to do some additional studying in those areas. However, while concentrating your studies on your areas of weakness, you should also be sure to do some additional preparation addressing the content covered in the other sections of the test. Remember, your score for the test is based on the total number of questions you answer correctly (combined with your scores on the constructed-response assignments, if applicable); therefore, improvement on any section of the test will improve your total score. Finally, you may also want to do some additional studying in the sections of the test that contain the greatest percentage of test questions when this information is provided, as they will contribute the most to your total score.

TEST PREPARATION QUESTIONS
